WHY SHOULD I CHOOSE HARD FLOOR CASTERS?

New office chairs are typically equipped with hard caster wheels intended to be used on carpeted floor. But what if the chair ends up on a hard surface such as hardwood, VCT, ceramic tile, concrete, etc? Rolling the hard caster wheels on hard flooring can scratch or permanently damage your expensive hardwood, linoleum or tile floors. An additional benefit is a reduction in noise level in the workplace.

Solution? Replace the existing hard caster wheels with polyurethane caster wheels. The slightly softer polyurethane material will help prevent the wheels from scratching the hard floor while allowing the wheels to roll smoothly and quietly.

Besides cosmetic, safety is another reason why polyurethane caster wheels should be used on hard flooring. Polyurethane provides better traction on hard floor thus reducing the chance of accidental slipping.

HARD SURFACE CASTER

Premium hard floor caster. Hooded. 2" dia.

CP

CPS Shroudless

Premium hard floor caster. Hooded. 2.5" dia.

CK

Casters lock while seated. 2" dia.

CPL^{ON}

Weight release activates brake to prevent chair from moving when not in use. 2" dia.

CPL^{OFF}

FURNITURE

CARPET CASTER

Standard hooded carpet caster. 2" dia.

CH

CS Shroudless

Premium carpet caster. Hooded. 2.5" dia.

CH-60

SPECIALTY CASTERS

Size: 2.5" diameter dual wheel

Material: Grey, non-marking Thermoplastic Elastomer

Capacity: 100 lbs per caster

Application: Medical

TP

Size: 2" diameter

Material: Grey, non-marking Neoprene, Chrome plated finish

Capacity: 125 lbs per caster

Application: Medical

Note: Can be disassembled for cleaning

NP

Size: 3" diameter

Material: Grey, non-marking Polyurethane "Dyna-Tred", Zinc finish

Capacity: 90 lbs per caster

Application: Extreme, factory, warehouse

Resistance: Resists chemicals, acids, caustic, and oils

Temperature: Range of -40°C to 82°C

BXNL-E

Size: 3" diameter

Material: Grey, non-marking Monoprene, Zinc finish

Capacity: 120 lbs per caster

Application: Medical

BXNL-M

Size: 3" diameter

Material: Black, non-marking Polyolefin, Zinc finish

Capacity: 120 lbs per caster

Application: Medical, factory, warehouse

BX

With lock

BXNL

Without lock

Size: 2.5" diameter

Material: Black, non-marking Neoprene, Chrome plated finish

Capacity: 165 lbs per caster

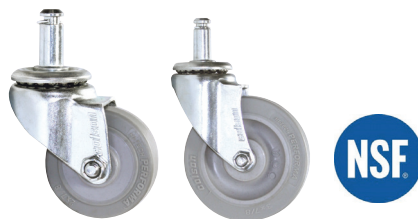

Application: Medical

Note: Can be disassembled for cleaning

Option: Total lock brake

NP25 Without lock

NP25L With lock

NSF: National Sanitation Foundation listed

Material: Grey, non-marking rubber, Zinc finish

Capacity: 75 lbs per caster

Application: Food service, Sanitary environments

Note: Can be disassembled for cleaning

NSF2

2" diameter

NSF3

3" diameter

NOTE:
**ALL CASTERS ARE SOLD
IN SETS OF 5 (FIVE).**
